

Street Sweeper Monitoring

Monitor the location, operating hours, fuel level and status of street sweepers across your fleet.

Track actual sweeping activity to distinguish productive operating time from travelling or idling, providing a clearer picture of machine utilisation.

Use operating hours and machine data to schedule servicing, identify faults and receive alerts when equipment requires attention.

Connect directly to the sweeper CAN bus to access engine, vehicle and machine operating data.

Use digital inputs or CAN data to monitor brush, PTO and sweeping system operation.

Use the inbuilt GPS to monitor location, speed and routes travelled without requiring additional hardware.

Receive SMS and email alerts.

Why Senquip?

Connect to Anything

Interface to any engine, controller, or sensor, no matter the brand, physical interface, or protocol.

Process Everything

Edge process measured data, create custom alerts, and control connected systems.

Send Anywhere

Send data to the Senquip Portal or any other server. No ongoing costs, no lock in contracts.

Trusted Everywhere

Designed for use in harsh industrial, mining, and agricultural environments.

Senquip ORB

For extreme environments where IP ratings are essential and external antennas may be damaged. Typically mounted on poles, walls, and externally on machines

Senquip QUAD

For harsh environments where external antennas are a benefit. Typically found in electrical cabinets, in operator cabs, and mounted externally on machines.

Senquip Portal

The Senquip Portal is a secure cloud solution that offers a no-cost or low-cost device management and data hosting + analytics solution for Senquip devices.

TELEMETRY FOR HARSH ENVIRONMENTS
