

Track every generator using built-in GPS.

Connect to the generator controller via CAN or Modbus for remote diagnostics and monitoring.

Monitor fuel level, battery voltage and enclosure doors using optional inputs.

Reduce theft with movement alerts and geofencing.

Know where every generator is and how it's performing.

Track location, engine hours and utilisation to maximise fleet productivity and improve return on investment.

Receive alerts for faults, low fuel, battery condition and unauthorised movement.

Reduce site visits, improve customer service and schedule maintenance based on actual engine hours – all from a single dashboard.

Why Senquip?

Connect to Anything

Interface to any engine, controller, or sensor, no matter the brand, physical interface, or protocol.

Process Everything

Edge process measured data, create custom alerts, and control connected systems.

Send Anywhere

Send data to the Senquip Portal or any other server. No ongoing costs, no lock in contracts.

Trusted Everywhere

Designed for use in harsh industrial, mining, and agricultural environments.

Senquip ORB

For extreme environments where IP ratings are essential and external antennas may be damaged. Typically mounted on poles, walls, and externally on machines

Senquip QUAD

For harsh environments where external antennas are a benefit. Typically found in electrical cabinets, in operator cabs, and mounted externally on machines.

Senquip Portal

The Senquip Portal is a secure cloud solution that offers a no-cost or low-cost device management and data hosting + analytics solution for Senquip devices.

CONNECTING MACHINES TO THE INTERNET
